

Environmental Policy

1. Policy Statement

Ironcraft Fabrications is committed to conducting its operations in an environmentally responsible manner. We recognise our responsibility to minimise the environmental impacts of our fabrication activities and to contribute to the sustainable use of resources while delivering high-quality products to our customers.

This Environmental Policy provides the framework for integrating environmental considerations into our decision-making and daily operations.

2. Scope

This policy applies to all Ironcraft Fabrications operations, employees, contractors, and suppliers where applicable. It covers activities related to metal fabrication, manufacturing processes, facilities management, and supporting business functions.

3. Compliance and Legal Obligations

Ironcraft Fabrications will:

- Comply with all applicable environmental laws, regulations, standards, and codes of practice.
- Maintain awareness of relevant environmental obligations and ensure these are communicated to employees and contractors.
- Regularly review compliance to ensure ongoing adherence to legal and regulatory requirements.

4. Environmental Objectives and Commitments

Ironcraft Fabrications is committed to:

4.1 Resource Efficiency

- Using materials, energy, and water efficiently across all operations.
- Promoting the responsible use of raw materials, including steel and other metals.
- Considering environmental impacts when purchasing equipment, materials, and services.

4.2 Waste Management

- Minimising waste generation through efficient design, fabrication, and planning.
- Maximising recycling and reuse of scrap metal and other recyclable materials.
- Ensuring waste is stored, handled, and disposed of in a safe and environmentally responsible manner.

4.3 Pollution Prevention

- Preventing pollution by reducing emissions, spills, and releases to air, land, and water.

- Implementing controls to manage noise, dust, fumes, and hazardous substances associated with fabrication activities.
- Maintaining equipment to reduce leaks, inefficiencies, and environmental risks.

4.4 Energy and Emissions

- Monitoring and, where practical, reducing energy consumption and greenhouse gas emissions.
- Exploring opportunities for energy-efficient equipment and processes.
- Encouraging energy-conscious behaviour among employees.

5. Training and Awareness

Ironcraft Fabrications will:

- Provide appropriate environmental training and awareness to employees relevant to their roles.
- Encourage employees to take responsibility for environmental performance in their day-to-day work.
- Promote open communication regarding environmental issues and improvement opportunities.

6. Continuous Improvement

- Set and review environmental objectives and targets where appropriate.
- Monitor environmental performance and identify opportunities for improvement.
- Regularly review this policy to ensure it remains relevant to our operations and business goals.

7. Responsibilities

- Management is responsible for implementing this policy and providing the resources required to achieve its objectives.
- Employees and contractors are responsible for complying with this policy and environmental procedures relevant to their work.

8. Policy Review

This Environmental Policy will be reviewed periodically and updated as necessary to reflect changes in legislation, operations, or organisational priorities.

Approved by: Management, Ironcraft Fabrications

Effective Date: 26/01/26

Review Date: 25/01/27
